Thank You for Supporting a Healthier America

Stewardship Report
Honoring 2019 Donors
Dear AMGA Foundation Participant and Donor,

I am proud of what we have accomplished in 2019. We extended our national Together 2 Goal® (T2G) campaign to 2021, and already we have reached more than 1 million people with Type 2 diabetes. We are continuing to measure success in the T2G Diabetes Bundle Best Practices Learning Collaborative, which offers T2G participants the opportunity to augment their quality improvement work. We launched the Medicare Advantage Learning Collaborative to help our member groups succeed with the Medicare Advantage payment model. We also recently launched the exciting HPV Vaccination Best Practices Learning Collaborative that aims to improve vaccination rates for adolescents. Furthermore, in 2019, we wrapped up our extremely successful Adult Immunizations Best Practices Learning Collaborative, which resulted in more than 5 million pneumococcal and influenza vaccines administered or documented at member groups nationwide.

With your support, we have reached 30 million patients, and we have developed and amplified best practices for care delivery with adult immunizations, chronic obstructive pulmonary disease, diabetes, heart failure, hypertension, obesity, rheumatoid arthritis, and more. We have identified innovations and disseminated findings so that individuals and communities throughout the U.S. can benefit from healthcare advances. Most importantly, these initiatives are pathways that lead to the Foundation's ultimate goal of creating a healthier America for 100 million patients by 2025.

In this report, you will read more about the value that AMGA Foundation provides to medical groups, health systems, and patients throughout the U.S. You will learn from new and sustaining donors why they give and why they encourage others to support the measurable results that AMGA Foundation's programs yield. If you have not already joined us as a donor, I hope this report will persuade you to do so. Together, we can change the course of chronic and preventable diseases in the U.S.

Sincerely,

Robert W. Brenner, M.D., M.M.M.
Chair, AMGA Foundation Board of Directors
President of Clinical Integration and Physician Enterprise, Valley Health System
2019 Corporate Donors

These industry partners are paving the way for a healthier America.

Thank you for your support of AMGA Foundation and your commitment to chronic care solutions!

“The Campaign for a Healthier America is important not only for improving the health of millions of Americans, but for showcasing what high-functioning health systems are capable of achieving. What better way to convince policymakers of the benefit of what AMGA member groups are capable of, than to show with objective numbers the better health outcomes we are able to achieve together for our patients.”

Steven A. Green, M.D.

“The programs developed and sponsored by the Foundation are nationally best in class. While all AMGA members are high achieving, no single member would be able to financially pull together the resources, devote the time and expertise, perform the data analysis and disseminate best practices to thousands of clinicians across the United States in the way AMGA Foundation has been able.”

Stephen Combs, M.D., FACP, FAAP, CPE
Vice-President and Chief Medical Officer, Ballad Medical Services
Ambassador, AMGA Foundation
Ballad Health is a Cabinet Leadership Donor
Dr. Combs is a Foundation Supporter

“AMGA Foundation offers a unique opportunity to collaborate with other medical groups across the country who freely share successes and failures, to develop a network of peers in similar organizations, to compare your organizational results against a national benchmark, and to innovate solutions to chronic disease together.”

Frederick Bloom, M.D., M.M.M.
President, Guthrie Medical Group
Board Member, AMGA Foundation
Guthrie Medical Group is a Cabinet Leadership Donor
Dr. Bloom is a Foundation Supporter

“Through AMGA we have access to quantitative data and best practices. We are part of a team that works to ensure we have the needed resources to help us address the health needs of our patients and of our communities.”

Randy Hemann, M.D.
Chief Medical Officer, Olmsted Medical Center
Olmsted Medical Group is a Cabinet Leadership Donor
