

Rise to Immunize™

Blinded Comparative Report

May 26th, 2023

Group-weighted average of vaccination rates across all organizations, year-over-year

Cumulative Measurement Year (MY) rates as of Q1 in each year

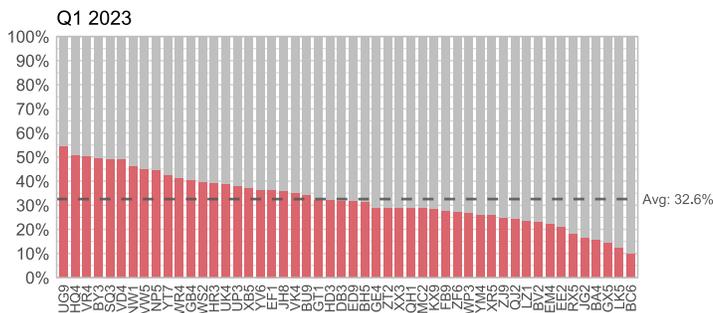

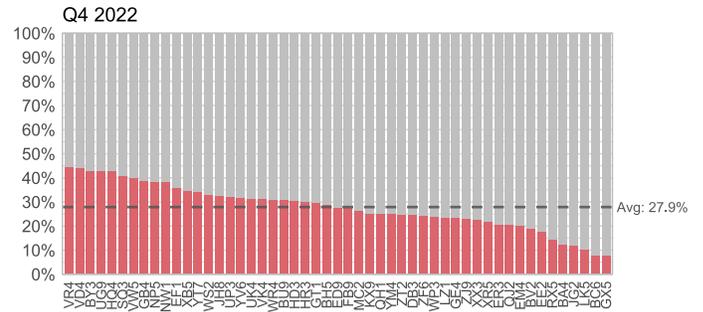

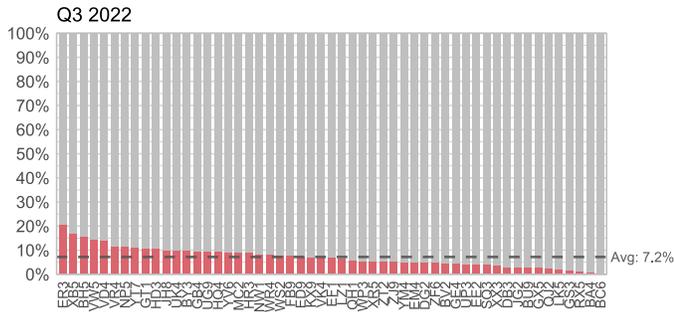

This plot compares the average rates of all Q1s in the campaign so far, including Q1 2023 (the most recent reporting quarter).

- The average pneumococcal vaccination rate across all organizations decreased by 5% this year (Q1 2023) compared to last year (Q1 2022), but this was expected due to the measure changes.
- The Td/Tdap vaccination rate is essentially the same as it was last year.
- The downward trend of influenza vaccination rates continued this year. Although there was an overall decrease, the decrease is smaller in Q1 than it was in Q4. Q1 '23 was only 2.1% lower than Q1 '22, compared to Q4 '22 vs Q4 '21, which was 6.2% lower.
- Zoster vaccination rates increased by 5.1%.
