Corporate Partner Program

AMGA: Advancing High Performance Health

At AMGA (American Medical Group Association), we're leading the transformation of health care in America because we believe in the power of healthier communities. By working alongside top professionals in our field and acting as their voice in the public sphere, we're paving the way for medical groups and integrated systems of care to deliver the next level of high performance health.

Together, we're more than just an association, we're a community of leaders. AMGA, our [Group Members](#) and our [Corporate Partners](#) form a team dedicated to dramatically improving population health and care for patients at lower costs.

More than 175,000 physicians practice in our member organizations, delivering care to one in three Americans. Representing many of the nation's most prestigious integrated systems of care, we have the insight and expertise to truly advance the way patients experience health care.

Since the COVID-19 outbreak began, AMGA has worked closely with medical groups, federal agencies, and other healthcare entities to respond to this challenge and to make sure our members have the most up-to-date information and resources. We've developed, and continue to aggregate, the most valuable resources on our [COVID-19 Resources webpage](#).

To become a part of the healthcare transformation, explore our work and join the conversation today!
