

INTENDED FOR U.S. HEALTHCARE PROFESSIONALS

# Help eligible individuals stay up to date with COVID-19 vaccination(s)<sup>1</sup>

The CDC adult recommendations include<sup>2,3</sup>:

- **Individuals 18 years of age and older** should receive a single dose of a 2024-2025 formula COVID-19 vaccine administered at least 2 months after the last dose of any COVID-19 vaccine\*
- **Individuals 65 years of age and older** should receive an additional 2024-2025 formula COVID-19 vaccine dose separated by 6 months (minimum interval 2 months), regardless of vaccination history\*
- **Individuals 18 years of age and older who are moderately or severely immunocompromised** and who had previously completed a multidose initial series should receive an additional dose of a 2024-2025 formula COVID-19 vaccine, 6 months (minimum interval 2 months) apart and may receive additional doses under shared clinical decision-making\*

\*The number of recommended 2024–2025 formula COVID-19 vaccine doses varies by age, vaccine, vaccination history, and the presence of moderate or severe immune compromise.<sup>3</sup>

CDC=Centers for Disease Control and Prevention.
