

# Chronic Care Roundtable

# WHO WE ARE

Industry and AMGA leaders are making a difference. Chronic diseases account for the vast majority of health spending: 81% of hospital admissions; 91% of prescriptions filled; and 76% of all physician visits. The Chronic Care Roundtable (CCR) is AMGA Foundation's initiative to address pressing chronic conditions by uniting medical groups, health systems, and industry partners to improve chronic care.

Members of the CCR are collaborating with AMGA leaders to help improve health outcomes for patients with chronic conditions and preventable diseases. Comprised of industry representatives from across the healthcare field, the CCR provides key resources and vital input to ensure better health and care for patients.

# WHAT WE DO

AMGA Foundation supports AMGA members and industry partners in their efforts to enhance population health. The CCR provides an opportunity for industry leaders, national clinical experts, and other key stakeholders to shape strategies, tactics, and metrics to improve care pathways for patients with chronic and preventable diseases.

Your company will be deeply connected to AMGA Foundation, our leaders, our board, and our AMGA member groups. We convene two annual and highly interactive meetings: one in the spring during AMGA's Annual Conference and one in the fall. The CCR is a collaborative effort in which participants share insights and engage in discussions that culminate in a meeting summary. Our enewsletter is published four times a year and features perspectives and updates from the CCR. We also provide access to customized online resources.
