

Navigating Immunization Reimbursement Pathways

National Vaccine Advisory Committee (NVAC) Standards for Adult Immunization Practice¹

Recommendation from a healthcare professional is the strongest predictor of whether patients get vaccinated.

1
ASSESS
immunization status
of all patients at every
clinical encounter

2
Strongly
RECOMMEND
vaccines that
patients need

3
ADMINISTER
needed vaccines or
REFER patients to a
vaccination provider

4
DOCUMENT
vaccines received
by patients

- Most private health insurance plans cover recommended vaccines²
- Flu and pneumococcal vaccines are covered for all Medicare beneficiaries age 65+^{2,3}

Pathways for Flu and Pneumococcal Vaccination and Billing

Inpatient immunizations are billed separately from the DRG rate.⁴

Alternatives to DRG Billing

Commercial and
Medicare Advantage

Check With the Plan

Check with the plan for information on billing and payment. Each plan can have specific rules for billing^{2,5}

Refer to Outpatient Providers

Refer patient to outpatient/retail pharmacy or to HCP – both can bill the health plan directly for flu and pneumococcal vaccinations^{4,6}

Medicare Fee
for Service

Roster Bill

Complete a modified form CMS-1450 and attach a roster form.
CMS reimburses for the cost of each vaccine outside of the DRG^{4,6}

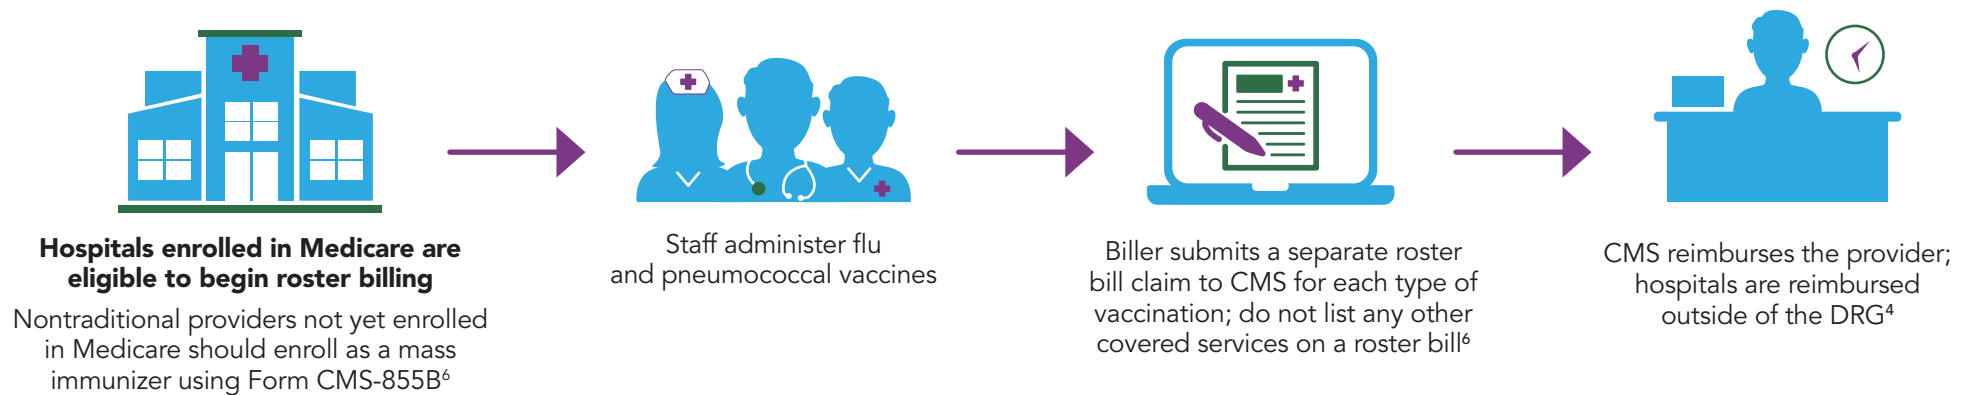

Refer to Outpatient Providers

Refer patient to outpatient/retail pharmacy or to HCP – both can bill Medicare directly for flu and pneumococcal vaccinations^{4,6}

Roster Billing for Flu and Pneumococcal Vaccinations

Roster Billing

A simplified way for mass immunizers such as hospitals and nontraditional providers* like public health clinics and retail pharmacies to bundle bill for flu and pneumococcal vaccinations administered to Medicare fee-for-service beneficiaries⁶

*Nontraditional providers refers to those that would usually be ineligible to enroll in Medicare, such as a retail pharmacy, health clinic, or senior center.⁴

For more information on roster billing, please contact your Medicare Administrative Contractor (MAC)
